

Insteon Dimmer Keypad (8-Button)

2334-222
www.insteon.com/wall-keypads

An Insteon Wall Keypad is a unique blend of wall switch and multi-button remote control. When you replace your existing wall switch with an Insteon Keypad, you keep control of your light fixture while simultaneously adding remote control of other Insteon devices.

Multi-in-One

Every Insteon Keypad is a powerful combination of wall switch and remote control. Replace your existing switch with the power to control devices throughout your home.

On/Off or Dimming

Depending on your lighting fixtures and electrical load needs, choose a Keypad that dims or doesn't and be sure that either can handle whatever you throw at them.

6 or 8 Buttons

Insteon Keypads come in both 6 button and 8 button configurations, letting you control 5 or 8 devices or groups of devices.

Scenes

Purpose-made to support easy activation of Insteon scenes throughout your home, our Wall Keypads excel at giving you one-button control over your entire home.

Features

- Two products in one: a six button Insteon controller and a 600-watt dimmer
- Monitor and control eight or more different Insteon devices
- Buttons can be replaced with custom-etched buttons
- 50-most-popular buttons available as an accessory
- Customize LED backlight colors with the LED Color Change Kit
- Create and activate whole-house scenes in just minutes
- Customizable on-level and ramp rate
- Control up to 600W of lighting
- Set schedules, configure scenes and remotely control Dimmer Keypad from your smartphone with the Insteon Hub
