www.insteon.com/wall-switches

The world's most advanced remote control wall switch.

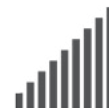

Remote Control

This is no ordinary wall switch. Insteon Wall Switches can be remotely controlled from almost any device in your home: Sensors monitoring doors, windows, leaks and more, remotes, keypads and other wall switches throughout your home, even your smartphone when used with the Insteon Hub.

Scenes

One of the most powerful features of Insteon switches, Scenes let you control multiple devices simultaneously with a single tap. Brighten all of the lights in an entire room with a tap-and-hold or create infinite virtual multi-way switches.

Customizable

No wall switch is more customizable. Change the paddle color to suit your décor needs. Swap out the LED light pipe for personalized colors. You can even custom-etch text onto the switch paddles for ease-of-use in multi-gang switch boxes.

Features

- Remote control from Insteon sensors, wall switches, remotes and more
- Customizable on-level and ramp rate
- Control up to 1800W of incandescent lighting, 17A resistive, 1HP motors or 10A ballast
- Set schedules, configure scenes and remotely control On/Off Switch from your smartphone with the Insteon Hub
